## **RE: QUANTIM LEGAL SOLUTIONS**

Quantim Legal Solutions have surely revolutionised accounting for attorneys and law firms. Being in the legal industry for 14 years this product has changed my opinion on matter finances and legal accounting in general.

Their system operates diligently through every aspect of my firm's accounts, from inception until final closing of the matter. Trust and business accounts are kept up to date on a daily basis, while having the much needed support of an experienced team allocated to our firm to attend to any query almost immediately.

The system integrates easily with E4 and Ghost Practice to eliminate having to capture the same data over different platforms. At the click of a button a matter will show every financial transaction thus keeping accurate record of the actual finances at any moment. We now have more time to attend to our matters instead of spending time on tedious financial calculations.

Quantim is directly linked to our Standard Bank profile and both trust and business payments are made easily in a fraction of the time it would take with manual payment submissions. Only authorised persons will have the permission to authorise and affect payments, therefore I remain in full control over every transaction in my firm. Beneficiary details are inserted only once therefore minimising the risk of making errors in frequent payments.

Audits are no longer a daunting task as Quantim is directly linked with my Auditor and they have full access to all the information needed to attend to audits.

The system is user friendly and probably one of the most important and valuable assets in our conveyancing firm. They are up to date with the ever-changing industry requirements while I can focus on managing and building my firm with peace of mind that the most important aspect of my business is being administrated diligently and effectively whilst having full control.

Yours faithfully,

Bianca Bell

Director
